Michael Kukla, silvercooled (Ausschnitt)

Zsuzsa Klemm, melusine

Maria Ortiz Gil, radiolarien

The winter comes with its soft white silence. The nature retreats, thin transparents cover the colors of the summer ...

A fascinating light refraction!

The diversity of the many white tones is the goal of this exhibition.

White is exclusive!

Twelve artists present from amazing angles their sense of the color white and the organic substance in works that have been made in connection with "organic white". Organic structures as a balance between static and fragility, a white fog that transforms mythological figures or white as cleaning the logical geometry of lettering and logos ...

White is warm!

On **two Advent Saturdays** the works will be courted by sensitive performances - on 28. November with spherical songs and on 12. December the senses of the body will be awoken in unexpected way.

White gives pleasure!

At the opening, the white color is celebrated! The clothing of the visitors will shape the white surface alive and in good faith. Play with us!

We are expecting you!

Irina Ilieva, aquabitArt
